DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michiya (US 6,296,493) in view of Takashi et al. (US 4,408,814).

Michiya discloses an electrical connector for connecting first and second printed circuit boards, the connector comprising the basic instant claimed invention except for at least one conductive media having a plurality of insulating layers and a plurality of conductive layers, wherein each conductive layer is formed between two insulating layers.

Takashi et al. discloses an electrical connector comprising conductive media having a plurality of insulating layers and a plurality of conductive layers, wherein each conductive layer is formed between two insulating layers [see figure 1].

It would have been obvious to one having ordinary skill in the art at the time invention was made to modify the connector of Michiya to provide the design connector as taught by Takashi et al. for the purpose of facilitate the reliable electric connection between two circuit board [see abstract].
